**THE MOUNTAIN VIEW
NURSERY CO.,
WILLIAMSPORT, MARYLAND**

Special Price List

TO THE PLANTER:—

Confident in the belief (if you are not acquainted with us) that you may give us a trial order for one or more combinations herewith and that you will thereafter deal regularly with us, we are making you some special inducements to have you give us an order at this time.

While we have faith to believe something on this circular will interest you, yet if it should happen that you cannot purchase at this time, write us anyway, so that we can get your name on our mailing list. Would thank you also to refer these valued offers to your neighbors who might be interested.

We are regular nurserymen, growing an immense lot of nursery stock and we feel that our trees are so strong, healthy and true to name that no matter what you buy, good results will follow.

Would thank you to read the entire circular and acquaint yourself fully with all we offer you.

BARGAIN No. 9

We have a fine bargain on bearing-size of Yellow Transparent, Duchess of Oldenburg, Grime's Golden, Stayman's Winesap Apple; Early Richmond and Montmorency Cherry trees; Burbanu, Washington, Abundance and More's Artic Plum Trees; Chabot, Gueii, Shropshire, Satsuma Plum Trees; Duchess d'Angouleme, Buerre d'Anjou, Clapp's Favorite, Lawrence, Howell, Early Harvest, Wilder, Seckel, Bartlett and Kieffer Pear Trees; Orange Quince Trees.

The above are bearing-size, extra large, fine trees.

\$1.00 each; \$10.00 per dozen, or \$5.00 for six.

We also have 4,000 Berberry Thunbergeii. Let us make you special price on this stock. Also have 50,000 California Privet, both one and two-year-old, which, raised on our strong land cannot be excelled by any other Privet grown.

We have every faith in the peach orchard. While prices have been low and unprofitable for several years, this only means that many people will abandon this business and cut out their orchards. You cannot afford to wait until the market is just to your liking to plant again. That plan would mean waiting four years lonegr until the orchard bears. PLANT NOW and when the market recovers, your orchard will be bearing and enable you to make good money on the investment.

We confidently feel that way about it.

Our catalog is at your command upon request, containing full description of what we have to offer (except some of the newer things in the circular). These are described there.

Freight and express are very low within 100 and 200 miles of us and we ship over all railroads and express lines.

Soliciting your valued orders, we are

Very truly,

THE MOUNTAIN VIEW NURSERY CO.

EVERGREENS.

ARBORVITAE.

Biota aurea conspicua. Originated at Augusta, Ga.; of compact, erect and symmetrical habit. Foliage intense gold; some of its branches being a solid metallic tint, others suffused with green. As its name implies, it is most conspicuous; easily grown and has stood perfectly in the east and west 20 degrees below zero.

B. Aurea Nana—Golden Arbor Vitae. The ever-increasing demand for this, the most popular of all Biotas, shows the great popularity of this plant. It is of very dwarf, compact and symmetrical habit; a perfect gem for small gardens or cemetery lots. It far surpasses in every way its parent, the old *Biota aurea*. For window-boxes and vases this plant is most effective. It is desirable where it is too cold for palms and other decorative plants. For formal gardens it is a great favorite. In many sections it has stood a temperature of 10 degrees below zero without injury.

B. Japonica filiformia. A Japanese variety with thread-like foliage; compact habit. We consider this one of the most distinct and desirable novelties and it is becoming a great favorite. Well suited for cemeteries; also desirable for tubs. Will probably obtain a height of 10-12 feet.

B. Pyramidalis. In this we have succeeded in getting a form of the pyramidal arbor-vitae which does not become brown during winter, but retains constantly its bright green color; of compact and pyramidal habit. A plant which fills a long felt want.

CEDAR.

C. Pedunculata fastigiata—Korean Yew. An upright variety of bushy habit, with narrow dark green foliage. Very hardy and desirable. Ultimate height 6-8 feet.

JUNIPER.

J. Sinensis argentea-variegata.—Variegated Chinese Juniper. Foliage somewhat similar to *J. Japonica*, but plant is more compact and dwarf growth; branches beautifully variegated, gold and yellow. This is a very hardy and a very desirable variety.

J. Virginiana glauca—Blue Virginia Cedar. Similar in growth to the common Cedar. Foliage a rich silvery blue, retaining its color well through the entire year. A magnificent variety.

Savin Juniper.—Juniperus Sabina. A spreading form, with deep green foliage. Very valuable for rockeries, grouping and borders, making a pleasant contrast to other low-growing trees. Its nature of growth adapts it particularly as a connecting link between the grass and the taller evergreens in a mixed bed or border. This year we are offering some excellent stock.

RETINOSPORA.

Retinospora filifera.—Thread Branched Retinospora. A beautiful variety with light green thread-like foliage, and slender drooping branches; of medium height. A very hardy and desirable sort.

R. Plumosa.—Plume-like Cypress. A rapid growing variety, with exquisite dark green foliage, the ends of the limbs drooping. Ultimate height 20-25 feet.

R. Plumosa aurea.—Golden-Plumed Cypress. This is one of the best, hardiest, and most desirable Retinosporas. Vigorous grower, retains its color constantly; attractive. Ultimate height 15-25 feet.
